Also, to be considered is the correctness of the horse while being led. Drifting to the side, leading, or stopping crooked, failure to maintain a pivot foot in a turn, leading and turning sluggishly should be considered and evaluated in the horse's maneuver scores and reflected in his overall score. Handlers should be discouraged from excessive verbal cues and excessive stiff or unnatural movements around horse or when leading. For safety reasons, those handlers continuously holding the chain on the lead, tightly coiling lead shank around hand, or dragging the lead shank should be penalized.
 - b. All faults are to be assessed against the horse and not the exhibitor (with the exception of scoring system)

4. Scoring System

- a. Will be on the basis of 0-infinity, with 70 denoting an average performance. Each obstacle will receive an obstacle score that should be added or subtracted from 70 and is subject to a penalty that should be subtracted. Each obstacle will be scored on the following basis, ranging from plus 1 ½ to minus 1 ½: -1 ½ extremely poor, -1 very poor, -½ poor, 0 correct, + ½ good, +1 very good, + 1 ½ excellent. Obstacle scores are to be determined and assessed independently of penalty points. Credits will be given to those horses negotiating the obstacles cleanly, smoothly, and alertly with style in prompt response to the handler's cues. Penalties should be assessed per occurrence as follows:
 - b. One half (½) point for each tick of log, pole, cone, plant or obstacle
 - c. One (1) point
 - i. Each hit of or stepping on a log, pole, cone, or obstacle.
 - ii. Incorrect or break of gait at walk or jog for two strides or less.
 - iii. Both front or hind feet in a single stride slot or space.
 - iv. Skipping over or failing to step into required space.
 - v. Failure to meet the correct strides on trot over log obstacles.
 - e. Five (5) points
 - i. Dropping slicker or object required to be carried on course.
 - ii. First or second cumulative refusal, balk or evading an obstacle by shying or backing.
 - iii. Letting go of gate or dropping rope gate.
 - iv. Use of either hand to instill fear or praise (slight touching or tapping with one hand to cue horse in a side pass maneuver is acceptable).
 - v. Stepping outside the confines of, falling or jumping off or out of an obstacle with more than one foot once the foot has entered obstacle; including missing one element of an obstacle on a line of travel with more than one foot.
 - vi. Blatant disobedience (including kicking out, bucking, rearing, striking or continuously circling the exhibitor).
 - vii. Zero (0) total score for course (disqualification).
 - viii. Performing the obstacles other than in specified order.
 - ix. No attempt to perform obstacle.

- b. Change of procedure. Where the local conditions and equipment will not permit the establishment of obstacles as specified and that they may require changing of procedures or

hand on the lead, then all competitors must be advised that such changing of procedure or of hands is permitted.

6. Exhibitor Requirements

- a. Exhibitor must use only the right hand on the lead where the chain begins, and lead on the horse's left side. A chain may be used under the chin or hanging from the halter. Exhibitor must use only the left hand to carry the excess lead, looped loosely except when:

- v. Bridge. A bridge with a wooden floor not to exceed 12 inches in height and with or without side rails not less than 48 inches apart will be used.
- vi. Water hazard. A ditch or shallow pond of water may be used. A horse must pass through this obstacle, which must be large enough so that to properly complete this obstacle all four feet of the horse must step in the water. Management may not place any item in the water. If a box is used, simulated water is permissible. If water is used, handler should walk to left of water while horse passes through water.
- vii. Simulated water. A plastic sheet, secured to the ground, so that it will not become affixed to the horse's foot when a horse passes over the simulated water.

e. Division D

- i. NOTE: If the object will be picked up/put down or opened/closed on the horse's right side, the handler is allowed to hold the horse and the excess lead in his/her left hand while negotiating the obstacle.
- ii. Carrying object. Any object other than animal or fowl which can reasonably be pulled or dragged by the exhibitor. This obstacle should be in the course design such that the item to be dragged is on the handler's left side. The excess lead may be carried in the handler's right hand.
- iii. Mailbox. Remove and/or replace items. Side pass is optional.
- iv. Animal hide. Lead next to an animal hide.
- v. Serpentine. Obstacle consisting of four pylons, guardrails optional, through which a horse will maneuver at a walk or jog-trot. Guardrails shall consist of poles placed parallel and a minimum of 4 feet from the base of pylons; walk-pylons, minimum 4 feet apart, base to base. Jog-trot pylons, minimum 7 feet apart, base to base.
- vi. Jog-through. Shall consist of poles I, double I, v, u, or similar shaped obstacle. Poles should be on the 3 feet minimum and 4 feet maximum. Handler may be inside or outside the jog-through.

STOCK HORSE PLEASURE

1. An exhibitor may show a maximum of two horses in stock horse pleasure.
2. Stock horse pleasure is open to any horse registered for WCJLS; however, it is not a requirement to show in a halter or in hand trail classes.
3. The use of protective headgear is required, unless a liability waiver is signed at check in.
4. This class serves to measure the ability of the horse to be functional and a pleasure to ride while being used as a means of conveyance from one task to another. This horse should be well-broke, relaxed, quiet, sWaoft and cadenced at all gaits.
5. The horse should be ridden on a relatively loose rein with light contact and without requiring undue restraint. Excessively log floppy reins will not be given extra credit. The horse should be responsive to the rider and make all required transitions smoothly, timely and correctly. The horse should be soft in the bridle and yield to contact.
6. Horses shall be shown individually at the walk, trot, lope and stop in both directions depending on exhibitor's divisions. Backing is only done at the conclusion of the pattern.
7. Holding the saddle horn is permissible in Junior division only.
8. When transitioning from the trot to the lope, it is permissible to take the horse back a bit (collecting) before loping.
9. The reverse may be executed in either direction.
10. Individual markers shall be setup to designate gait changes. When establishing or setting up marker, the following distances are recommended. These distances will make for a more fluid class to be exhibited and facilitate ease in judging. In smaller arenas, it may be necessary to adjust the course to get distances similar to those recommended.
 - a. Walk – 30 feet
 - b. Trot – 120 feet
 - c. Lope – 150 feet (Intermediate and Senior Division only)
 - d. Stop
 - e. Reverse
 - f. Walk – 30 feet
 - g. Lope – 150 feet (Intermediate and Senior Division only)
 - h. Trot – 90 feet
 - i. Stop
 - j. Back – minimum of one-horse length (or 4 steps)
11. Description of ideal pleasure gaits
 - a. Walk – a stock horse pleasure walk should be straight, square, flat footed, relaxed and should move out freely with no anticipation to move to the next gait.
 - b. Trot – this gait should be a square two-beat diagonal trot. The trot should be steady, soft and slow enough for riding long distances. Trots which are rough and hard to sit should be penalized. Excessively show and uncadenced trots should also be penalized.
 - c. Lope – this gait should be a three-beat gait that is cadenced, straight and steady and is comfortable to ride over long distances.
 - d. Stop (from both lope and trot) – the horse should be in the correct stopping position – both hocks engaged and stopping on the hindquarters.
 - e. Reverse – a horse should turn briskly and flat with front feet on the ground and holding an inside rear pivot foot.
12. Part of the evaluation of this class is on smoothness of transitions. There is no advantage to making these transitions with cues that are imperceptible to a judge. Judges expect to see horses that been trained to respond to cues. To see these cues applied discretely and the horse responding correctly

could be a credit earning situation.

13. All transactions should be smooth without undue fuss from the horse. Please note that the rules allow for a horse to be taken back (collected) a bit from the trot as the horse moves into the lope. Horses that bring the hocks together to go into a stopping position should be penalized according to the magnitude of the error.
14. Scoring stock horse pleasure
 - a. Each gait, including transitions toward that gait, will be scored from 1-10. There will be 5 scores in each direction for a total of 10 scores and a maximum of 100 points for each horse's work.
 - b. The scoring guide of each maneuver, including transitions, is as follows:
 - i. 1-4 points – major faults such as wrong lead, broken gait, lack of control, very poor quality of gait, failure to perform requested gait.
 - ii. 5-7 – average quality of movement of gaits and transitions with minor or no faults 8-10 points – high quality mover that is functionally correct in gaits and transitions. Well-mannered and responsive.

HORSEMANSHIP

This class recognizes the exhibitor's ability to ride a horse functionally and correctly using various aids to cause the horse to perform required basic maneuvers. This class may be ridden western or English.

GENERAL

1. Riders will be judged on basic position in the saddle, which includes the position and use of hands, seat, feet and legs, as well as the ability to control and show the horse.
2. Scores on individual works will be based on rider's skills and execution of the pattern.

POSITION

1. Arms and hands. Arms and hands should be held in an easy, relaxed manner. Upper arms are held in a straight line with the body, with the arm holding the reins bent at the elbow. Only one hand is used for reining, and hands shall not be changed on the reins. The hand is to be around the reins with one finger permitted between split reins. Reins are to be carried immediately above and slightly in front of the saddle horn. Reins should be held so that light contact is maintained with the horse's mouth.
2. Back position. The rider should sit in a comfortable balanced, relaxed and flexible manner. The lower leg should hang straight down from the knee or forward to the stirrups with a slight bend in the knee, depending on the type of saddle. In either position, stirrups should be just long enough for heels to be lower than toes. The feet should be placed in the stirrups with the boot heel touching the stirrup or slightly less deep. Riding with the weight on the toes will be penalized. The toes should be turned only slightly out, with the ankles flexed in a comfortable position. The lower legs and feet should be kept close to the horse's body, but not in contact except when applying aids.

S

The rider shall sit the jog and not post. The rider should be close to the saddle at lope. Exaggerated shifting of the rider's weight is not desirable and will be penalized in judging.

CLASS ROUTINE

1. The judge will ask each rider to work individually. Individual works will be combination of maneuvers that the judge feels are necessary to determine the horsemanship ability of the rider. The pattern must include only maneuvers from the following list:
 - a. straight walk, jog, and lope, and circles in both directions.
 - b. stop

- c. back straight, in an “L”, and in a circle
 - d. 360-degrees
 - e. Pivot, both ways
 - f. Turns of 90, 180 or 270 degrees
 - g. Rollbacks
 - h. Lope circles of varying size and speed
 - i. Pick up leads from standstill, walk or jog
 - j. Simple lead changes on a straight way or in a circle
 - k. Side pass
 - l. Counter canter
 - m. Two track
2. The pattern should be posted at least 1 hour before the class begins, if at all possible.
 3. The judge will use these individual work scores to determine the top riders who will be asked to work individually or on the rail. Selected riders (or all riders if the class is small) will be required to work on the rail to determine final placing. Rail work is optional for the State Show and may or may not be held.
 4. Rail work will include walk, jog and lope in one or both directions of the ring at the discretion of the judge.

RIDING TRAIL

This class will be judged on the performance of the horse over obstacles, with emphasis on manners, response to the rider, and quality of movement. This class can be ridden in both English and western discipline. Credit will be given to horses negotiating the obstacles with style and some degree of speed, providing correctness is not sacrificed. Horses should receive credit for showing attentiveness to the obstacles and the capability of picking their own way through the course when obstacles warrant it and willingly responding to the rider’s cues on more difficult obstacles.

1. Horses shall be penalized for any unnecessary delay while approaching or negotiating the obstacles. Horses with artificial appearance over obstacles should be penalized.
2. Horses 1) must not be required to work on the rail. While on the line of travel between obstacles, the horse shall be balanced, carrying his head and neck in a relaxed, natural position, with the poll level with or slightly above the withers. The head should not be carried behind the vertical, giving the appearance of intimidation, or be excessively nosed out, giving a resistant appearance. Gait between obstacles shall be at the discretion of the judge.
3. The course to be used must be posted at least one hour before scheduled starting time of the class.
4. Scoring will be on the basis on 0-infinity, 70 denoting an average performance. Each obstacle will receive an obstacle score that should be added or subtracted for 70 and is subject to a penalty that should be subtracted . Each obstacle will be scored on the following basis, ranging from plus 1 ½ to minus 1 ½: 1 -1 ½ extremely poor, -1 very poor, -½ poor, 0 correct, +½ good, +1 very good, +1 ½ excellent. Obstacle scores are to be determined and assessed independently of penalty points. Penalties should be assessed per occurrence as follows:
 - a. The following deductions will result: 0-score
 - i. Performing the obstacles incorrectly or other than in specified order
 - ii. No attempt to perform an obstacle
 - iii. Equipment failure that delays completion of pattern
 - iv. Excessively or repeatedly touching the horse on the neck to lower the head
 - v. Fall to the ground by horse or rider

- vi. Failure to enter, exit or work obstacle from correct side or direction, including overturns of more than ¼ turn
Failure to work an obstacle in any manner other than how it's described by the course
 - vii. Riding outside designated boundary marker of the arena or course area
 - viii. Third refusal
 - ix. Failure to demonstrate correct lead or gait, if designated

 - vii. Stepping outside the confines of, falling or jumping off or out of an obstacle with more than on foot
 - viii. Blatant disobedience (kicking out, bucking, rearing, striking)
 - ix. Failure to complete obstacle
5. Management, when setting courses, should keep in mind that the idea is not to trap a horse, or eliminate it by making an obstacle too difficult. All courses and obstacles are to be constructed with safety in mind, so as to eliminate any accidents. When the distances and spaces are measured between all obstacles, the inside base to inside base measurement of each obstacle considering the normal path of the horse should be the measuring point. Enough space must be provided for a horse to jog (at least 30 feet) and lope (at least 50 feet) for the judges to evaluate these gaits.
6. If disrupted, the course shall be reset after each horse has worked. In the case that a combination of obstacles are used, the course cannot be reset until the contestant finishes the entire course, regardless of where any disruption occurs.
7. At least six obstacles must be used, three of which must be from the mandatory list of obstacles, and at least three others selected from the list of optional obstacles.

 - b. Ride over at least four logs or poles. These can be in a straight line, curved, zigzag or raised. the space between the logs is to be measured, and the path the horse is to take should be the measuring point. All elevated elements must be placed in a cup, notched block or otherwise secured so they cannot roll. The height should be measured from the ground to the top of the element. Spacing for walk overs, jog overs and lope overs, should be as follows or increments thereof.
 - i. The spacing for walk overs shall be 20" to 24" (40cm to 60cm) and may be elevated to 12" (30cm). Elevated walkovers should be set at least 22" (55cm) apart.
